Silicon Valley... My Xerox PARC Experience!

- Xerox Corporation – 1990

- ✓ Member of Engineering Staff – Electrical Engineer
- ✓ Software Engineer

- Graphical User Interface (GUI)
- Windows
- Mouse
- Xerox Network Services
- Laser Printer
- Office Suite of Applications
- Ethernet
- Object Oriented Programming

1972

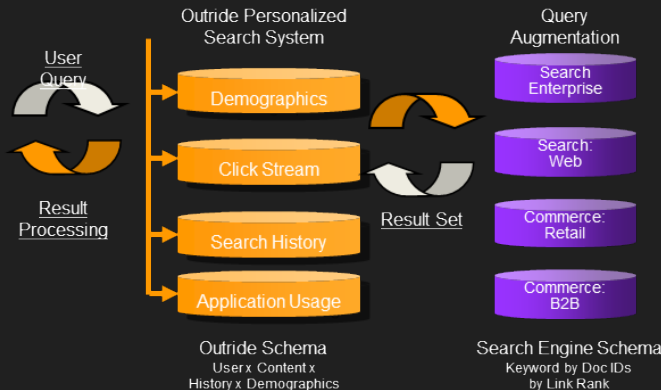

- **Outride, Inc. – 1999 - 2001**

- ✓ Co-founder – Vice President of Engineering
- ✓ A Xerox PARC spinoff
- ✓ Project team spun off (7 scientists, and 2 engineers) to start up new company
- ✓ Raised funding through Venture Capitalists (VCs)
- ✓ Built company of staff of 50 engineers
- ✓ Established Data Center Co-location
- ✓ Negotiated major deals to establish “new company” infrastructure and partnerships

Contextualized Client Interface

Company Sold to Google in 2001

- **Lawrence Livermore National Lab.**

- ✓ Responsible for developing and supporting applications used to operate and maintain nuclear systems
- ✓ Led a major, 3 year, multi-million dollar to manage maintenance activities of a nuclear reactor.

- **Motorola, Inc.**

- ✓ Director, Engineering Program Management
- ✓ Research and development of new technologies
- ✓ All engineering deliverables – from requirements, through design, development, and quality assurance
- ✓ Marketing, customer support, partner integration, 3rd Party Development, and 2nd Generation Cost Reduction
- ✓ The engineering team consisted of staff (~500) from multiple Motorola organizations in 12 geographies across the world (Russia, India, Taiwan, China, Israel, and multiple sites in the U.S.A.), and several vendors (Microsoft, Adobe, etc...)

- High-def, quad-tuner (CableCARD and OTA)
- Whole-home DVR/DMA with support for Internet-delivered content
- Hardware supported transcode to enable content transfer to mobile phones.

NASA Centers and Installations

Ames Research Center

- Occupants:
 - ~1130 civil servants; ~2,100 contractors; 1,650 tenants
 - 855 summer students in 2016
- FY2016 Budget: ~\$915M (including reimbursable/EUL)
- ~1,900 acres (400 acres security perimeter); 5M building ft²
- Airfield: ~9,000 and 8,000 ft runways

Small Spacecraft Technology Program

PTD

Novel CubeSat Technology Demonstrations

Nodes

Autonomously Configured In-Space Network

ISARA

High Data Rate Reflectarray Antenna

CPOD

Rendezvous, Proximity Operations and Docking

OCSD

Proximity Operations and Data Transmission

Astrobee... Next Generation Free Flyer Robot

11+ years aboard ISS

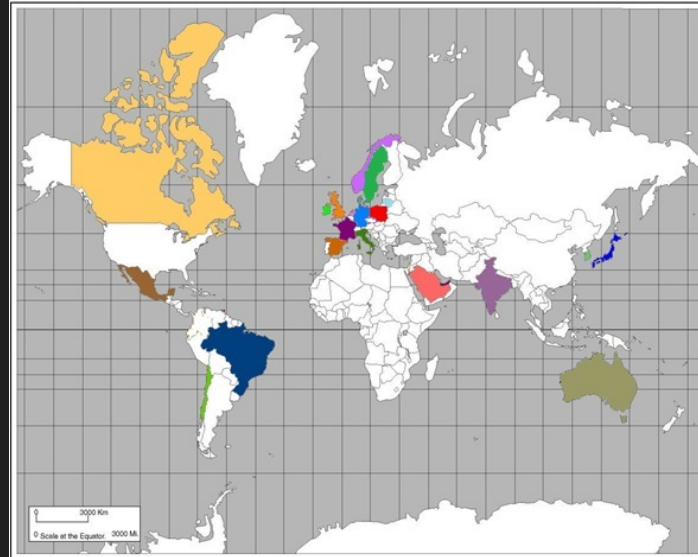

Late 2018 on ISS

International Partnerships

Interns/ Visiting Researchers

Australia, Brazil, Denmark, France,
Japan, India, Ireland, Israel, Italy,
Mexico, Norway, Peru, Poland,
Spain, Korea, UAE, UK

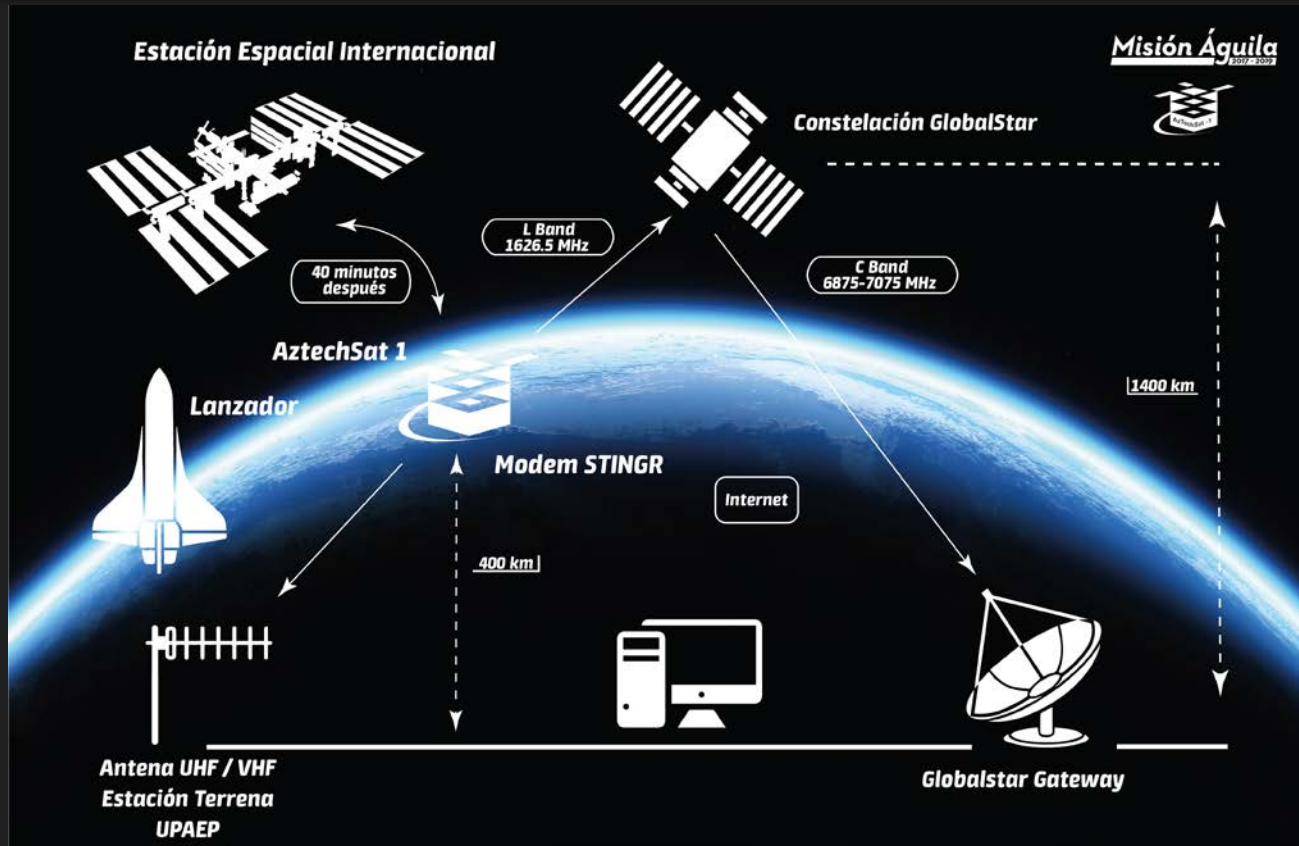

Technical Collaboration

Canada, Chile, France
Germany, Italy, Japan, Lithuania,
Mexico, Netherlands, Norway,
Saudi Arabia, Sweden, Spain,
Trinidad & Tobago, UK

AztechSat-1 - NASA – AEM Collaboration

28 years in SV and have worked in the private sector and public sector, in two fortune 100 companies, two federal government agencies, and co-founded an Internet company

In college I learned the value of setting Goals and Objectives and Follow through

Early learned the importance of Teamwork

That Work Ethic has the same Value as your Skills, Knowledge and Abilities

That it's okay not to know everything... but to develop a plan and be proactive to acquire the required knowledge

That it's okay to take risk responsibly

That there much to learn from both Failure and Success

The importance of defining your own career path and creating your own opportunities

That you have to feel that you have the "Best Job in the World" and if you don't, than do something about it.

Lessons Learned... So Far!

So far, that's my evolving engineering career... !

"We are all faced with a series of great opportunities brilliantly disguised as impossible situations." - Charles R. Swindol

"Luck is what happens when preparation meets opportunity"

- Seneca quotes (Roman philosopher, mid-1st century AD)
